The Stumbling Spirit

About me

For most of my professional career, I worked in the tech industry as a customer support leader. Almost a decade ago, I began my mindfulness journey, incorporating the practice of presence into my life on a regular basis. In my pursuit of personal wellness, I attained several mindfulness certifications. In 2018, I started my Reiki training and have since become a certified Reiki Master and Teacher of this holistic modality. In 2021, I left my career in tech to launch my own wellness business called Resting Bell Wellness Inc., which is now branded under the name of my podcast, The Stumbling Spirit.

Purpose & Value

For many organizations, employee engagement is a benchmark for measuring workplace morale and staff satisfaction. In this post-Covid world, some companies are striving to find ways to reconnect with employees and create opportunities for them to relate with one another after years of isolation and working from home. Leaders who want to improve corporate culture often hold team building events, i.e. PD days, workshops and conferences. One way to set the tone for a full day of break-out sessions and important discussions is mindfulness. By interspersing my mindfulness practices into your day's agenda you will:

- **Inspire an atmosphere of calmness and openness**
- **Foster trust and collaboration**
- **Encourage honest and effective communication**

These qualities are essential to truly understand your team, get to the root of issues, find solutions and achieve common ground. This proposal is a sampling of what you might expect from my mindfulness practices.

What is Mindfulness?

Mindfulness is the practice of compassionate presence. From this standpoint, we embody the attitudes of non-judgement and loving-kindness to notice what is happening in the here and now, and to understand what we might need at any given moment. Since it is a practice, we approach it with intention, purpose and consistency.

Through mindfulness, we:

- Direct our awareness in a deliberate way to see what arises
- Focus and re-focus our attention to our body, senses, imagination, environment etc.
- Surrender to the present moment
- Approach ourselves, others and situations with compassion
- Soften the edges of our suffering

While it can bring up uncomfortable thoughts and emotions, benefits include: relaxation, less stress & tension, reduced anxiety, increased compassion, peace-of-mind, self-regulation etc.

About Mindfulness Practices

Mindfulness practices comprise a collection of intentional heart-centred exercises to ground in the present moment by directing ones attention to the body, senses, environment and imagination to promote an equanimous state of being. It has a range of benefits including relaxation, stress-relief, emotional self-regulation and healthier thought-patterns – it literally rewires the brain.

Mindfulness has existed for thousands of years and is present in many faith traditions. Since the 1960s, mindfulness has been studied in the West from a secular lens and scientific perspective in understanding its benefits to the brain and body.
